

## SWISH AND SWIPE

Everyone wants a clean house, but who has time to clean it? Follow this simple tip and your sinks will stay pristine between cleaning days. Every time you brush your teeth, or use a wash cloth to remove your make up, simply use the same washcloth to swish and swipe your sink and countertop. Keep the cleaner under your sink for a quick spray once a week for added sparkle. It's fast and easy and leaves your sinks shining bright. Swish and swipe after every bath and never have a ring. Swish and swipe each time you wash your dishes and your kitchen will always look great (well, almost always). You won't believe how much of a difference these 15-second routines will make. Like everything, it becomes a habit, so put a sticky note on your mirror until you remember.
